5. COLLISION ANALYSIS brief

Accident Report

a) The taxi driver of Subject Vehicle (SV) SHA3236S reported that on 17/06/2017 at about 2150 hours, he was travelling Mountbatten Road towards PIE.

While approaching the cross junction at Nicoll Highway, he affirmed that the traffic light was green to his favour and proceeded ahead. Suddenly, a vehicle bearing plate number SHC1759C came from Sims Avenue and both vehicles collided.

Vehicle damages

b) Damage profile to the taxi appear consistent with the reported accident. Its right front portion sustained impact damage of a moderate-heavy nature. As the front right wheel was subjected to the impact from the collision, it would have been consistent that the front undercarriage would have sustained induced damage
