Dear Ong Li Li,

This was what happened:

When I drove to work (NTU Novena campus) on 27th Nov 2017, while we were waiting for the green light, from Newton Rd to Moulmein Rd, I was the first car in the 2nd lane from right which allows me to go straight. The taxi was the 2nd car in the lane on my right; the lane allows him only turn right! When the light turned green, while I was driving straight, suddenly I felt something bounced my car, then immediately my right front mirror flipped over (changed direction!). I immediately stopped the car out of shocking. The taxi was moving forward and turning right then stopped. The driver came out and shouted at me to hit his car! I was totally shocked by his accusation and told him that he hit me not I hit him because he was behind me! He was the 2nd car in the lane, I was the first! He's supposed to turn right but he drove straight! The marks on the car showed clearly that the hit was from behind towards front!

I was worried about my car so that the first thing I did was to push the mirror back to the right direction and tried to put the cover back. I failed to put the cover on. I asked him to help then found him taking photos so that I started taking photos too. He asked me to settle the things off the road but after I put the cover back I couldn't find him so that I drove to work. I even didn't manage to get his contact. I was told that his tire hit my car so that the marks are black. His car's front hit my side. We couldn't see any damages of his car in the photos.

Before he's driving off, I spotted a person sitting at back seat of the taxi. Unfortunately, I didn't get his contact either. Can we check the taxi driver's video and get the contact of the passenger? Could we ask the passenger to be the witness? Could we ask for the traffic camera too?

Thank you very much,

Sorry that I couldn't submit more useful pictures and get the contact of the passenger. I was totally shocked and was very upset with the damages of my newly bought car!

Do feel free to contact me,

Li Li
