

Brief details.

The rental car was under my friend's name. Her leg was cramped up due to an event we had earlier that day. So i took over as she could not continue driving.

5-7mins later as i was just moving off from the traffic light when a taxi from the right lane change into my lane (most left) and made a sudden stop infront (double yellow line) to pick up a passenger.

To avoid major damages, i swerved to the right and the taxi side mirror scratch onto my leftside rear car which lead to the taxi sidemirror casing to come off. I moved my car and stop at the next bus stop as there was oncoming traffic. No one was injured in the scene.

We exchanged contact. He wasnt cooperative when we asked him to call the taxi company (smrt) when we ask for the dash cam he insisted that he dont know how to retrieve the video eventhough the sd car was taken out.
