Dear Ms Winnie,

From our investigations, the smell of burning oil started emitting from the engine after the engine was operating for approximately 10 minutes. Usually when this occurs, it may be caused by oil seeping out from the top cover of the engine through the top cover gasket probably due to wear and tear.

Thank you.

Best Regards,

Naz | Technical Investigator

Hi Naz,

Pls advise the cause of the burnt smell followed by white smoke emitting from the front portion of the engine, engine oil seepage from the front portion of the top camshaft cover of the engine. (is it due to wear & tear?)

Thanks & Regards

Dear Ms Winnie,

I have completed the Fire Investigation Report and forwarded it to Mr Lau and my senior for review. I will email it to you once they have gone through it.

Thank you.

Best Regards,

Dear Ms Winnie,

As per your instruction via our telephone conversation on 22/12/2017 at 1630 hours, here are the events which transpired during my attempt to inspect the Insured Vehicle on 19/12/17 at SME Motor at 1430 hours. The workshop personnel informed me that the Insured Vehicle had been repossessed over the weekend by the finance company; Effizzig Credit.

I managed to contact Effizzig Credit and get authorization to inspect the Insured Vehicle at their repossession compound later that same day. have performed the vehicle inspection.

The Insured, Ms Pereira has yet to answer my call. I have sent her a text message to return my call a.s.a.p.

I shall update you accordingly.

Thank you.
