**Brief details.**

On 15/11/2017 at about 0925hrs, I was on my bike, riding on dual carriageway, leaving the airbase. I saw an oncoming fuel bowser at the opposite direction. I slowed down and continued riding as I saw the fuel bowser was also slowing down. Suddenly the fuel bowser made a right turn into a motor transport line and caused me to collide into his left bumper, as a result I fell. He failed to give way and did not signal. I managed to talk to the other driver and was informed that he did not see me. Afterwards, an in-house ambulance came and brought me to the medical centre to get emergency aid.

I then went to NUH for further medical examinations. I suffered abrasion on my right palm, right knee and my left shoulder. I was given 3 days MC.

The road I was riding on was a gradual curve and had no other traffic. The road was slightly wet. The speed limit of the road is 40km/h. During the accident, I was riding at about 15km/h. I am unsure of the other party's speed but he was not driving fast. There is also CCTV footage of the accident.

My bike is a red and white Honda 'SuperFour' bearing the registration plate number FBB8485Y. The fork of my bike was bent, one of my mirrors was broken, a plate for the box was cracked and one of the signal lights dropped. I am not sure if there are any more damages as I was brought to the medical centre immediately. My bike has been towed away and currently at a workshop.

The fuel bowser is grey in colour and bearing the registration plate number MID5033. It does not have any damages from the collision.
