**Subject:** ACCIDENT INVOLVING SLJ 6894C & SGB 1889C

Dear Sir,

Please refer to the above matter and your letter dated 13 December 2018 received by me today.

I do not agree with your third paragraph as the damage that is being claimed by SGB 1889C could not have arisen from the opening of my car door, even if my passenger had opened the door onto that car. This is clearly shown from the photographs as when my car door is opened onto the other car, it touches that other car at least 6 inches away from the dent damage claimed. Further, there is no scratch mark leading from where my car door touches his car to the dent claimed. Please let me know how you came to the conclusion that the damage claimed was caused by my passenger when the photos show otherwise. Further, the amount claimed is excessive considering the age and model of his car. There was no damage to my car.

Clementi Police Station had also contacted me about this matter on or about 24 February this year and I informed them I had no intention of settling as the damage was not caused by the opening of my car door.

Please do not settle this matter for the above reasons and also because it will affect my NCD. Without prejudice, I am willing to give him \$300 outside of the insurance so as to settle the matter quickly, but if he insists on proceeding I am prepared to take this matter to court on my own account.

Thank you.
