Dear Sir,

Please refer to preceding e-mail.

As you requested, I have drawn another Sketch Plan showing the Estimation Distance(s) and Point of Collision.

On 04/04/2018, I met the Pedestrian at the RTA scene. The pedestrian manage to recall 'the point where he start to cross the road' and 'the point of collision with the motorcar'.

I hope the Sketch Plan(s) will help you to determine the Speed Calculation of the motorcar.

Thank you.

Subject: Enquire in Speed Calculation of motorcar

Dear Sir,

I am Investigating in a case of Road Traffic Accident, involving a pedestrian and a motorcar.

Details is as following:

Location: Yishun Avenue 7 towards Yishun Avenue 8, before Yishun Avenue 2, near lamp post number 31

Date: 27 January 2018

Time: about 1.47 pm

Brief Facts of Case

Motorcar was travelling straight along Yishun Avenue 7 towards Yishun Avenue 8, on Lane 2 of 3 lanes road, when a pedestrian crossed the road, from motorcar's right to left.

Motorcar driving was unable to stop in time and collided into the left side of the pedestrian.

There was no CCTV at scene and no in-car camera from the motorcar.

Motorcar had returned to driver.

In regards to the case, I would like to enquire, will LKK be able to do a **speed calculation** of the motorcar?, based on Sketch Plan, Vehicle Damage Report and pictures of scene and the motorcar.

Please refer to attachments.

Thank you.

Hand-drawn sketch of a building layout. The sketch includes a large rectangular area with a curved boundary on the left. Dimensions are marked with arrows and fractions: $1/2$, $1/8$, $3/2$, $1/4$, $6/1$, $2/1$, $4/3$, and $1/4$. A small square area is labeled $2/1$. A curved arrow points from the bottom left towards the center. The text "Entrap No." is written on the left, and "59269" is written below it. The sketch is labeled "Sketch" in the top right corner.
