TO WHOM IT MIGHT CONCERN

Re: Hit and run accident between a parked motorcycle FT8871Z and a car SKC140H on 10 May 2018 at about 6.10pm at the open car park of Siglap Centre along Siglap Road.

At around 6.10pm on the 10th May 2018 my Wife and I was walking on the pathway from Siglap Centre towards Frankel Road. As we passed the coffee shop no more than 10m from Siglap Centre we heard a loud crash. We were adjacent to a car. Walking 2-3 m forward adjacent to a pet shop, there was a motor bike on its side and by it a Mercedes car was stopped. An older lady was in the driving seat. A man got out of his car that I'd just walked past. The biker's helmet had been left on the bike and it had hit the back of the car. There was 2 or 3 other people there, including Mark the car owner (which the helmet had hit his car), a young lady with him and a young student. It was apparent that the Mercedes has nudged the front wheel of the bike & it fell over. The driver of the Mercedes had stopped & a number of us witnesses saw the incident waved to her that she'd knocked the bike over. Traffic was building up behind her, she decided to drive off without getting out the car. Mark's Girl friend took a picture of Mercedes driving away. Petrol was running from the bike & we all picked up the bike & wrote the note for the bike owner to contact us should he wish.

I confirm I didn't know anyone at the scene of the accident.

I am willing to testify should it be necessary.

My IC is S2696071A.

Regards
