DESCRIBE CIRCUMSTANCES OF THE ACCIDENT

I was driving in the middle lane along Xilin Ave towards ECP around 7:50 am on 26 May 2018. My car drove over a metal bracket which was lying in the middle of the center lane (middle/centre) of the road. The metal bracket was stuck below the car chassis and had to make an immediate stop and then moved my car safely to the left lane of the road without causing any damage to other vehicles.

Because the metal bracket was stuck, had to call Audi Service center to get over the situation. Audi arranged the towing service and helped to pull out the bracket. I asked Towing service to bring the car direct to the service center for checkup, even though the car is functional and in good condition to drive. To avoid any risk, I took decision to get the car checked.
