At around 0900hrs to 0920hrs, I was driving from BKE towards PIE TnS. Because it was raining the road is slippery. Bike 'C' skidded and fell at the bend. Car 'B' immediately emergency brake and could have hit bike 'C'. I also emergency brake, but my car hit car 'B' rear. My car front was damaged by the hard metal of car 'B' mercedes car. The rear of mercedes car 'B' was only slight dent and a bit crack only. Car 'B' mercedes car could have hit bike 'C'. Car 'B' driver said there is some scratches in front. Both of us confirmed there was no injury. We helped Biker 'C' to get up from his fall and assisted his bike to the shoulder. Car 'B' rear was slightly dented and no injury of the car 'B' driver and his passenger. I took some pictures of the slight dented rear of car 'B' and there are no damages on other parts of his car apart some chipped off and no injuries from car 'B' and bike 'C' who fell off on his own and biker was also not injured and all of us drive & ride off from the scene.
