Brief Details:

On the 28/07/2018, at about 1330hrs, I was driving my government vehicle bearing plate number 34543MID along CTE towards city just exited Ang Mo Kio Avenue 5. I was on the second lane attempting to change lane to the third lane. I checked the left lane for clearance and proceeded to make the lane change when suddenly a lorry bearing plate number GBG4735B sped up. I then jammed my brake and the lorry also jammed his brake. His top right part of the vehicle then knocked into the front left part of my vehicle. His vehicle right headlight cracked and there are some minor scratches on my vehicle. No one is injured. TP was at scene and they advised us to come down and make a police report.

I, S9842555A, 3SG YEO EN ZHU EZRA have a statement to make.

I was the vehicle commander of MID 34543. We were driving out to Teck Ghee N4 Park for a sweep.

At 1330hrs, we exited the CTE from exit 14, down the ramp to enter Ang Moh Kio Avenue 5, and we stopped in the second lane from right, to begin merging to the left lane. My DV, LCP CHEM RAY KIAT SEAN, turned on his signal and checked the rear and side mirrors for any vehicles. As there were none nearby, he began to slowly merge into the next lane, while I rolled down the window and prepared to signal with my hand. As the front left of the QRV entered the lane, a lorry, GBG4735B, suddenly sped up and drove through the lane. The front left of the QRV collided very lightly with the front right head light of the lorry, causing it to break slightly. The paint of the lorry was also scratched off, while the paint of the QRV scratched off where it collided.

At this point, both drivers braked immediately and we exited the vehicles to assess the damage. After a photo of the scene was taken, we both pulled over to the leftmost lane to avoid obstructing of traffic. We turned off the engine and called the Ops room to report the incident. After exchanging information, we were advised to call the traffic police and report the incident. They arrived on scene at 1405hrs, and after taking photos of the damage and taking our statements, they said we were free to carry on, and to make a follow up report at the Neighbourhood Traffic Police Centre.

S9743465D, LCP CHEM RAY KIAT SEAN have a statement to make.

was the driver for QRV MID 34543 that was involved in a traffic accident.

Prior to the accident at around 1330hrs, while taking exit 14 on CTE highway towards Ang Mo Kio Avenue 5, I asked 3SG YEO regarding where I should turn after driving down the lane. Since he was holding onto the route card and navigated, he told me to turn left into the slip lane but my position of the QRV was in the second lane so it was a bit tough to filter one lane to the third lane then make the left turn. That is when we decided to change one lane to the left and to take a detour as it was quite risky taking the turn. It was then I slowed down my vehicle to almost a half, checked my mirrors and signalled left.

From the mirrors, I saw around two incoming cars on the third lane in which I let them to overtake me first. That is when I didn't see any more vehicles in my mirror so I gradually turned left and started to move slowly into the third lane when suddenly I heard my passengers shouted, "Lorry". I immediately stepped on the brake hard but the lorry was too fast and it still slightly hit onto the lorry. The front left bumper of our car hit the front right headlight of the lorry and the headlight of the lorry cracked, while our QRV suffered from minor scratches on the front of the vehicle.

We immediately stopped our vehicle on the side of the road and called the Ops Room for further advice. They then told us to call and report to the police. The traffic police came at 1405hrs to assist us and told us to report to any neighbourhood police post within the next 24 hours. I exchanged my driver details with the driver of the lorry and we left the incident scene at 1415hrs.

I, S9514089J, 3SG JOVINUS ONG ZI JUN have a statement to make.

I was on QRV MID 34543 that was involved in a traffic accident for sweep understudy with 3SG YEO's team.

To my understanding, we exited CTE exit 14 which had a down slope before leading to where the accident happened. We were about to merge to the left, so the signal lights were on and we slowed down. When we were in the middle of changing lanes, we heard someone in the vehicle shouted, "Lorry", and we jammed the brake. Before that, the DV ensured that he turned to look behind and there was no vehicle on that lane. The lane change was slow and gradual and I did not even notice the lorry.

After that, we both drove to the merged lane on the left and we went on a halt. Thereafter, 3SG YEO contacted the Ops room and reported the incident.

That is all I have to say.
