Brief Details.

On 02/10/2018 at about 1200hrs after I parked my car one silver colour Honda Vezel bearing plate number SLJ1186X at the carpark of my home, I realized that there were scratches and dents on the rear right passenger side of my car near to the rear right tyre. However I do not know what had caused the dents as such I went to view the video footage from my in-car cameras (front and back).

After viewing the footages, I noticed that it was a hit and run accident that had caused the scratches and dents on my car. From the footage on 02/10/2018 at about 0736hrs, while my car was parked at the small road of the shop houses along Bedok Road (near to bus stop B85061), there was a silver Mercedes car which had collided to the rear right side of my car. The collision sound could be heard clearly from the video footage and there was also a slight movement of my car when the collision happened.

Thereafter, the Mercedes tried to reverse back however to no avail and it then drove past my car and left without leaving any particulars down. I managed to take down the car plate number of the Mercedes as SJS8579U from the video footage. This is the first time such incident had happened to me.
