DESCRIBE CIRCUMSTANCES OF THE ACCIDENT

This was lesson 2-01. Our group had started to practice the ebrake and bumber courses. I had started off and changed the gear up to third gear as I approached the third cone. My speed was about 38-45KM/h. As I had gotten closer to the first line, I had to brake gradually and used both front and rear brakes. As this was happening, I lost control of the bike and the bike started to wobble. The bike went out of the usual way and hit the curb next to the ebrake course. This happened in a flash and I fell first followed by the bike. The bike landed on my leg and left side of the body. I fell face forward but my helmet protected me from any injuries. My left elbow was wounded and the bike was still on my left foot. The instructors pulled the bike and I tried over with a lot of pain. The instructors called the ambulance and I was taken to Ng Teng Fong hospital.
