Dear Sir.

Specialist Medical Report for AINI BINTE MOHAMED NOOR - S7000386D

I have referred to the following reports as a background:

- Singapore Accident Statement dated 17 May 2016.
 - 2. Traffic Police report dated 3 May 2016.
 - 3. Ambulance report from the Singapore Civil Defence Force dated 27 March 2018.
 - 4. Inpatient discharge summary from Changi General Hospital (CGH) dated 10 May 2016.
 - Medical report from CGH dated 22 November 2017, prepared by Dr Pravin Thiruchelvam.
 - Specialist medical report from CGH dated 12 January 2018 prepared by Dr Low Boon Yong.
 - 7. Specialist dental report from CGH dated 2 February 2018 prepared by Dr Lai Juen Bin.
 - 8. Photographs of the accident vehicle (3-wheeler) belonging to Mdm Aini Binte Mohamed Noor.

I have reviewed the above documents, and reviewed Mdm Aini in person on 10 October 2018.

The relevant facts pertaining to the likely mechanism of injury of Mdm Aini's accident on 29 April 2016 are as follows:

- 1. I note Mdm Aini's helmut frontal scratches of visor after the accident.
- 2. She had sustained multiple injuries to the bone and teeth around the jaw.
- 3. She had sustained multiple bilateral upper limb injuries.
- 4. There were thigh abrasions bilaterally.
- Mdm Aini was found on prone position by SCDF when the ambulance crew arrived.
- There was a transverse crack of the posterior aspect/tail cover of the 3-wheeler (indicates posterior impact)
- 7. There were scratches on the right side of the 3-wheeler and front of the handle bars.

(RN:201406644W)

Dr Lim Yi-Jia Gleneagles Medical Centre #07-19 6 Napier Road Singapore 258499 Main line: (65) 64797372 24-Hour line: (65) 85132324 Fax: (65) 64797378 Email: drlimyilia@gmail.com

My opinion with regards to the likely mechanism of accident and the resultant injuries/vehicular damage is as follows:

- 1. Mdm Aini's 3-wheeler was hit from the back and the vehicle fell on the right side, with the steering wheel turned to the right, sustaining scratches to the anterior handle bar and top of the IU unit.
- 2. Mdm Aini was thrown forward, and landed on her front (she likely put forward/up her hands to protect herself/break fall) sustaining scratches to the front helmut visor, hitting and fracturing her jaw/injuring her teeth, sustaining multiple injuries including fractures while breaking fall with both her upper limbs, and also sustained abrasions to both anterior thighs as she landed.
- 3. A self-skid accident is not likely as this would have resulted in more one-sided injuries, and not in the manner as described above.

In making this report, I affirm that the facts stated in my report are within my knowledge, which I have made clear and believe them to be correct at the time of the writing of this report. The opinions expressed represent my accurate and complete professional opinion. This report is made in full awareness that the duty is to the court, and not to the person(s) from whom I have received instructions or payment.

Thank you very much and sincerely yours,

Dr Lim Yi-Jia

Consultant Orthopaedic Surgeon
