Brief Details.

On 10/1/2019 at about 1230hrs, I was driving on the extreme right lane of AYE towards city on my grey Mitsubishi car (SLE5581M) while doing Go Jek. I have one female passenger seated at the rear left seat. I was travelling about 80km/h and the traffic volume was moderate at that time. Suddenly, I felt a hard impact from the rear and it caused my car to jerk in front and collided with the black Mercedes car (SJY338B) in front. I then alighted and discovered that there was on Toyota police car (QX5249P) had collided with the rear of my car. I then exchanged particulars with the driver in front of me who was not carrying any passengers. To the best of my knowledge, nobody was injured at that moment. I then given my handphone number to the lady police officer. I observed that front and rear bumper of my car was dented badly. The rear bumper of my car was dislodged and I had difficulties driving the car as the rear left wheel and the rear bumper were hitting each other. After confirmation with the police, I then drove my car to the bus stop after North Buona Vista Road exit and called for towing services. I wish to state that I had an in-car camera which is not working.
