Dear Priscilla

The term modern day vehicle refers to those diesel engine vehicles fitted with the Euro 4 onwards engine. Due to environmental emission issue, car makers are tasked to develop diesel engine that produces less harmful gases. The first batch of such diesel engine vehicle was produced as early 2006 however there is always development of engine technology. Hence up to today, diesel engine vehicles production and development is still on-going but may be lesser in the future due to the development of electric or hybrid vehicles for less environmental pollution.

getting heavier. When the traffic light was green, I drove my company vehicle inside the open space carpark of Blk 229 Pending Road and parked my company vehicle between Lot 443 and 444 as I worried that the company vehicle will caught fire and damaged other vehicles.

I then immediately took my belongings, alighted the car and I called for SCDF at about 12.33pm. I wish to state that I had bought the company vehicle 6 years ago and I do not have any issue with the company vehicle.

My company vehicle last went servicing on November 2018. After the SCDF put out the fire, another vehicle bearing registration number SLW9658E which was parked at lot 441 was also caught fire due to the wind direction and was badly damaged. I also wish to state that Wearnes the agent for my Jaguar company vehicle had called me and make an appointment on 30/01/2019 in the morning between 8am to 9am as they informed that there the batch of the Jaguar vehicle have problem. They also informed that I do not need to pay.
