### Describe Circumstances of the Accident

On 26 May 2019 at about 11.45am, I was driving along Holland Road in the ~~dis~~ direction of Holland Village. I was driving on the right lane. It was a clear day. The road surface was dry. Traffic was light and smooth. I was driving around 50-60 km an hour. When I reached the traffic junction where there is a right turn into ~~Buona~~ North Buona Vista Road, the traffic lights were green. Suddenly, the car in front of me (a silver Toyota Corolla Altis, SJL 9498 G) stopped at the traffic junction to turn into North Buona Vista Road. I did not notice whether it had turned on its turning indicator light. I checked my rear view and side mirrors. Since the road behind and beside me is clear and there were no cars, I swerved to the left to ~~overtake~~ the ~~car~~ stationary car. Unfortunately, I misjudged and the right bumper of my car hit the stationary car's back bumper, ripping it off. The back of the stationary car is damaged. The front and right side of my car is damaged. No one was injured.

These findings also have implications for the use of the *Phragmites* as a natural barrier to salt water intrusion. The study found that *Phragmites* can reduce salt water intrusion by up to 50% in some areas, but this effect is highly variable and depends on many factors, including the density of the vegetation, the depth of the water, and the direction of the flow. Therefore, while *Phragmites* can provide some protection against salt water intrusion, it is not a foolproof solution and should be used in conjunction with other measures, such as levees and seawalls.
