Brief Details.

On the 14/9/2019 at about 1215hrs, I was driving my car bearing the registration plate number, SKP4106M along paya lebar road. I was approaching a traffic junction and saw that the traffic light had turned red as such I started to slow down before fully coming to a stop. After I had fully stopped my car, suddenly I felt a strong impact from the rear of my car and saw that one car bearing the registration plate number, SJS2131Z had hit onto my car and pushed my car slightly forward. I would like to note that there is a car infront of my car however I did not hit the car infront from the impact as there was sufficient gap between my car and the front car. After the car behind me had hit onto me, there was a third car bearing the registration plate number, JMS331 that also hit onto the car behind me which caused an accident
