Dear Naz,

Below formula for your reference:

1. Depreciation of taxi per month:
= (Cost of taxi – PARF benefit at end of 8 years)/Life span of taxi (8 years) in months.
2. Book value of taxi as at date of accident:
= (Depreciation per month from (1) x life span left as at date of accident) + PARF benefit at end of 8 years.
3. Write off value of taxi as at date of accident:
= Book value from (2) – PARF/COE rebate at date of accident – Salvage value of wreck.

We had tried doing the calculation based on the formula above and the amount we get turn out to be negative. Please assist to do the calculation and get back to us urgently.

Thank you

Best Regards
