DESCRIBE CIRCUMSTANCES OF THE ACCIDENT

On Monday 9th dec around 7pm, I was heading toward Guoco Tower for dinner. It was raining. I was traveling alone Maxwell road towards shenton way. I was turning into Wallich street. As it was raining, I didn't see that it was a non-right turn junction, and I also didn't see the kerb island (see attached) due to the poor visibility. As I was turning, a car came from the opposite side and I accelerated, and I mounted and went over the kerb. When my car dismounted from the kerb island, mg car have lost tyre pressure signal for both my front tyres. I immediately parked at the open carpark beside Guoco Tower, and when I inspected the car, both front tyres have burst but there was no other exterior damages.

09:46

I called for tow truck to tow my car to Soon Huat Tyre at Enterprise Hub so that they can change my tyres on Tuesday morning. After I collected the car on Tuesday late morning, I realized that my car drives with a lot of noise and vibration. That's when I sent my car to MBM workshop at Sin Ming. MBM only assessed the full damaged and give me the repair cost assessment on Wednesday evening. Upon receiving the assessment cost at \$10k, I realized that I need to claim insurance for the repair.

There was no other 3rd party involved nor was there any body injuries.
