Brief Details.

On 30 April 2019 at around 9.10am, I was driving my office vehicle bearing registration plate no. SLA2081E alone along ECP towards MCE, on the way for despatch duty. I was driving along the second lane from the left, entering MCE from ECP. Traffic was heavy and it was the peak hour jam. As I was inching forward, the vehicle in front of me bearing registration vehicle no. SLJ9690D suddenly jam brake and causes my vehicle to touch the said vehicle. I do not know if the centre vehicle did hit onto the front vehicle, SJU9905B.

The front most vehicle registration vehicle no. is SJU9905B, a Blue Nissan Sylphy, does not suffer any damage and there are no other passenger in the car. The centre vehicle registration vehicle no. is SLJ9690D, a Nissan Latio, has slight damage to the left rear side of the vehicle and there is a male passenger inside the vehicle. My vehicle front bumper is out of alignment. There is an in-car camera in

my vehicle pointing to the front and rear of my vehicle. I managed to exchange my particulars with all the other drivers and I have made a check with all the drivers and passenger and check if anyone require any medical assistance. So when no one inform that they are injured or suffering from any discomfort, both vehicles drove off first before I move off. No police and ambulance attended. I am lodging this traffic accident report as record purposes.
