Dear Hock Ann,

We have previously submitted our original supplier invoice to you, but the pricing on the invoice is the same as what we have given in the repair estimate. This is because previously when we submitted the supplier invoice, which is our cost price of the parts, the third party insurance company question us on why it is different from the repair estimate, which is the list price. Repair estimate is list price while supplier invoice is cost price, definitely the amount on the invoice is lower.

However, since this has caused issues for us, our supplier has provided us the invoices with list price, and has issued separate credit notes for us to prevent issues when submitting original invoice. Please call me if you have any questions, it is easier to explain over the phone.

With warmest regards,

Jeslyn

We are unable to accept the COR offer. It is too low to cover our costs.

Kindly counter propose.
