We refer to the reference above.

Our insured reiterated that he was driving the car in his own lane all the way and being hit by your client who changed lane.

Enclosed herewith is the statement of our insured for your record purposes.

After reviewed the both reports, we noted that there is in car camera captured the accident.

Therefore, in order to follow up our insured on his dispute, please provide us a copy of video footage for our urgent basis.

Brief Details.

On 04/05/2016, I was driving my taxi (SHF710H), along Eunos Link heading north, driving on the 3rd lane. The traffic at that time was very heavy. The lane I was in was straight only. There were two lanes to my right that was meant for vehicle

While driving straight, a car (SKP4291K), suddenly tried to cut into my lane from the right side in my lane. As the car was turning into my lane, the car swiped the right side of my car and a scratch on my right driver door. ~~We were not driving at a fast speed~~

I wish to state that my vehicle has an in-vehicle camera on both the front and rear dashboards. I will provide the footage to you for your investigation. I am sorry that I did not save the footage due to the accident.

During the accident, I had 2 passengers in the car that I was going to drop off at the destination.

Best Regards,
