BRIEF FACTS: A motor accident has taken place on 6/4/15 at about 8:15am
along location of RT 2292 towards B&B (near Woodlands Area) between
vehicle MDY 5881 and vehicle 2JH 60346. I am an eye-witness/passenger in the taxi
and I wish to recount its happening as follows

taxi was moving at 40-50 km/h, following the speed of majority of
other vehicles.

Car A was at our left side. its position was half a car in front of
us. Suddenly Car A abruptly drifted to the right heading towards our
lane without giving any signal. It is observed that the taxi driver attempted
to brake and simultaneously, slightly veered to his right with the intent to
avoid a collision with car A. Upon doing so, an oncoming car behind us
on the right side of the lane was also slowing down without
slowing down. The taxi driver then instantaneously
veered back to the left, going back to his initial lane. With that
action taken, it was observed that Car A continued to proceed to
our lane. That is where contact was made between the two
cars.

Note: I vouch that the taxi driver was driving safely at all times.
I commend him for ^{trying} his best to avoid the
collision.

I affirmed the above statement true and correct.
