Report No. T/20180109/2164

**CONTINUATION OF REPORT**

**Brief Details.**

On the 09/01/2018 at about 1730hrs, I was driving a CNB unmarked vehicle which originally bore the registration plate number of QX1320S and the car plate now is SLL9162B along BKE towards KJE exit near to lamp post 282S1.

The car In front of me bearing registration plate number of SLD103Z suddenly applied it's brakes so I also applied my brakes. The car behind of me bearing registration plate number of SJF3948X could not brake in time and it's front bumper collided into my car's rear bumper.

The rear vehicle's owner and me went out of our vehicles to make a check on the damages while the front vehicle drove further in front and stopped at the road shoulder. No one was injured during the accident. My car's rear bumper was severely dented in while the rear car's front bumper was severely dented in. The front car's driver came and told us that my car's front bumper had collided into her car's rear bumper.

I went to make a check and discovered that my car's front car plate number was slightly dented in but I could not notice any damages on the front car's rear bumper at that point of time. I only realized what looks like slight scratches on the front car's rear bumper now when I am doing this report after looking at the photos I took of the scene. We all exchanged particulars and I informed them that the car we were driving was a government vehicle and that they were required to lodge a traffic accident report and they acknowledged.
