Hi Khanchna,

As requested, I managed to get the photo of the car taken on 24 Jul 2020. For your perusal please.
I would like to share that Tras Street is all parallel parking lots. On that day, there is an empty lot in between 2 cars. SMJ 2529 J is in front. The car for parking into a lot is moving at a very slow speed. After the car has gotten into the lot, step 2 is to move forward and step 3 is to adjust the steering wheel and move backward to park within the lot.
At step 2, when the car is moving forward, the car is only able to move at about 5-8km/h, very slow and very narrow space. The front of the car bumper just "kiss" the front car rear bumper. When we went down to check, there wasn't any dent. Because if the car was moving forward too fast and bent on the front car too hard, there would be a deep dent. The lad owner agrees there isn't any dent. But she then started talking about the paint work. I have explained to her that there is no paint stuck on any part of my car plate. And not caused by me. As we were late for the dinner appointment, so I gave the male driver my mobile number and thinking after the lady checked with the father and called me back, I am willing to "paynow" them \$30 to \$50 to settle the matter. As I don't have their mobile number, I just had to wait for their call, But they waited till 13 Jul evening then called me. I was working at that hour and texted my agent (Mr Richard Hue) to assist me to contact their insurance agent from INCOME. First, they say they wanted to settle by signing a no-claim settlement form, later they told Richard they have changed their mind and wanted to file a claim for the report.

I didn't have any video or the accident scene photographs because I found there is no damage to both cars.
I am checking with my family members who were with me that evening as we were attending a dinner.
If I have any, I will let you know and will be happy to send to you.

Thank you
