Dear Jia Le,

I have paid for bodywork repairs and paintworks in recent years. I have also seen repair bills of body work repairs of other motorists. The cost of repairs is only a few hundred dollars in both cases. Yet you allowed a claim of several thousand dollars. I cannot understand the disparity in cost of repairs and intend to bring the matter to the attention of the insurance company.

In my opinion, the medical leave given and expenses claimed are very dubious. I am also stunned by the huge claim that was submitted by the taxi driver's lawyers. I do not know how much you have agreed to pay as compensation. I think it is totally unfair. I request you to arrange for a meeting with AIG's representative to settle this matter.

Thank you,

Solomon Fang

Dear Solomon,

We have repeatedly viewed the video which clearly revealed that taxi stopped behind your vehicle prior to your reversing.

The video shows that taxi has stopped behind your vehicle is not dropping any passenger but to give way to its front vehicle who was turning towards opposite lane(refer to the video). To reverse the vehicle with flashing light is to warn the other motorists of your intention but you still have to ensure the safety of the rear before reversing.

With regards to the medical claim, our principal is currently looking into the matter.

Third party has stopped his vehicle behind you before you reversing the vehicle. Therefore, we are of the opinion that you do not have a good case to defend.

Thank you.

Note: We are on work from home arrangement. All correspondence should be made via email. Submission of claim related documents will be in softcopy. Any inconvenience caused is much regretted.

Best Regards,

Dear Jiale,

The time shown on the video that was sent by you is about 10 minutes after the incident happened. You can check the photographic evidence submitted by me which confirms my statement above. Their video has no relevance to support their claim. Please take this into consideration in your submission.

In my view the taxi driver was inattentive. It is clear that he was intending to stop his taxi behind my car to drop off his passengers. Could he be in a hurry? He should have seen my flashing reverse lights indicating my intent to reverse my car. Reverse lights and gear were already engaged for several minutes. How did he miss seeing my flashing reverse lights which were right in front of him, and clearly in his view as there was no traffic to block his view.

The taxi driver's lawyer also claimed that his client suffered "injury" that required 2 days medical leave. This injury cannot be believed because the cars "touched lightly". It was not a robust collision. I have a witness in my vehicle that will testify to this statement that I have made.

In my view, the taxi driver is at fault. I was already reversing my car to the location where our vehicles collided. It was clear that he had an unobstructed view of the traffic condition 70 to 80 meters ahead. Therefore it is clear I have the right of way. As such I would request you to take this into consideration in adjusting the damages claimed.

Thank you.

Yours faithfully,

Fang Chang Chhun, Solomon
