Subject: RE: Accident involving SMQ 7771 T and SCM 9995 Ron the a9/06/20

Dear Sir/Mdm,

We attached the rear and front video for your reference again.

Refer to the rear video footage, your vehicle did collided to third party vehicle at 0.00.28 until end of the video. The sound of impact / friction between the 2 vehicles can also be heard very clearly at the time of impact.

Next , you mention that there was a van or lorry presented , but the vehicle were only appeared after your vehicle drive past the junction . Based on the front video footage , your vehicle turning at 0.00.02 while the van/lorry park came and stationary at the junction next to third party car at 0.00.36. Then, the van/lorry start reversing backwards and there is no sign of collision between the van/lorry with third party car.

Thus it is very hard for us to deny liability, since all evidences are not in our favor.

Further to that, we noted as well the Traffic Police have conducted their investigation and SCM 9995 R have committed an offence.

Perhaps, you could appeal the results of the Traffic Police and let us know if there is any reversal of the results by the Traffic Police.

We will be happy to review the case after your appeal is concluded.

Thank You.

Best Regards,

Dear Jasper,

Thanks your e-mail and attachments of videos.

I have replayed your videos over and over again

But did not see my vehicle passed or crashed the third party vehicle in the rear videos.

From the rear videos footage shows my car enter from the main road to the food courts, as you can see my car reversed to pass the small road where the third party has park his vehicle, due to the bend I have slowly drive through the road it was big enough for me my car to pass through.

It is useless to appeal to the traffic police , it should have done in the first place before they charged me for the offences fines and merit points.

Before you settle with the third party, please refer to my earlier e-mail to you.

Thanks .
Thomas Heng

Dear Jasper,

Thank you for your e-mail of 12th July 2021.

I am glad that AIG has not settle with the third party yet.

Can you investigate.

After much consideration and going through the video clips over and over again.

I realised that not only my vehicle was present at that time, there was a Van or lorry (looks a like) park very closed to the third party car and stop at the junction next to his car.

Awhile later the said vehicle reversed backward followed by my vehicle passed through and exit the car park, the road was big enough for me to pass through , there was no accident to the third party car.

Lastly, the report he submitted to TP with the drawing of his SKETCH where he parked his car at 64 Loyang way Singapore 508754. He claims that my car was turning at the BEND when I hit his vehicle rear driver side door.

If I did hit his car, his car will be badly dented and my car left side HEAD LAMP will be broken and the side body damaged.

When I make the report to LAI HUAT AUTO In sing ming auto city your appointed agent they have taken pictures of my car front, back and rear both sides ,there was no signed of collisions.

You can request from Lai Huat the pictures for your reference.

Kindly advise whether I have to send my car to your workshop for inspection.

Thanks and regards

Thomas Heng
