Hi

TP police report said that he took a photo before he drove his car forward. Also, the video he provided is not complete. How did he first realize that OI had contacted his rear portion. If he retrieve is vehicle by walking from the front of his car, I don't think he will know, unless he walked from the back to the driver side

The video he provided showed he can walk easily in between both vehicles so this was after he moved forward like he said in his police report.

Looking at the damage pattern, there seems to be contact by OI number plate at the horizontal part of the number plate.

Go and get the photo and video first. Tell VGS that their client mentioned these docs in his police report.

Best Regards,

**Bryan Ang**

Hi Bryan,

TP alleged that Insured vehicle hit his parked vehicle. But our Insured is saying no collision because there is a barrier in between the cars and no damage.

Both have video ( saved in V drive/Khanchna/smg256m).

TP workshop (Volkswagen) said they don't have any accident photos.

I can't see any impact from the video.

Surveyor- Rasul is of the view that there is collision between both vehicles.

Appreciate your views please on whether there is any collision between both vehicles.

Thank you.

Best Regards,
