To Whom It May Concern

Dear Sir,

**Ms Tan Sue Yee Joanne; SA 8315004**

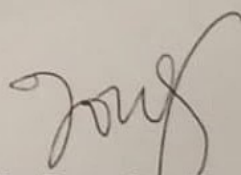

I would like to inform you that Ms Tan is under my care for her pregnancy. Her EDD is 06 September 2021.

She consulted me on 16 January 2021 when she was at 7 weeks gestation, following a road traffic accident. Ultrasound scan then revealed occult bleeding behind the placenta and she was supported with hormone tablets and injections until 12 weeks.

She had follow up ultrasound scans on 3 February 2021 and again on 3 March 2021 when she was 13 weeks gestation. Her medication was stopped thereafter following confirmation of fetal viability past the 1<sup>st</sup> trimester.

Thank you.

Sincerely,

**Dr Douglas Ong**  
Obstetrician and Gynaecologist
