Hi Aida,

We refer to the above matter. Our comments is as follows: -

- The accident scene is quite closed to the T-junction with Empress road where most of the motorists used to travel to and from the main road, so traffic is congested especially in the morning time.
- Third party mentioned in her report that she stopped her vehicle behind ER35X, our bus hit her and pull her vehicle over the lane marking which is not logical. If her vehicle was stationary along the left lane, it is not possible to drag her vehicle beyond the lane marking. In addition, the damage profile of third party vehicle shows that her vehicle tried to move to the right side before the collision resulted in a huge dent. The independent witness statement also mentioned that third party vehicle went to turn right and the bus collided with her.
- Any vehicle intends to move out from stationary position must ensure traffic on the right is safe and no vehicle overtaking from behind before proceed.
- If vehicle parked or stationary along left side of the road, even those in the vicinity of pedestrian crossing, vehicle behind is allowed to overtake parked/ stationary waiting vehicle along the road in order to proceed, provided driver must ensure that there is neither pedestrian crossing the road nor on-coming vehicle approaching. So the Basic Driving Rules cited is still subject to actual circumstances of the road before overtaking.
- Third party workshop quoted BOLA Scenario 28(d) and 28 (e) to hold insured liable is not appropriate.
- We are of the view that BOLA Scenario 28(k) is more practical and feasible to fit the existing collision.

28.	(k)	 New	Vehicle C lost control and hit onto both B and E D is 100% liable to C C is 100% liable to both B and E B is 100% liable to A Reason: To avoid costly litigation for collision damages.
