CONTINUATION OF REPORTBrief Details.

On 04 April 2021, I was driving my SLB1531A with 2 Grab Passengers seated on my rear along Ang Mo Kio Ave 5 towards CTE. As it was raining and many cars were heading towards the same direction, traffic was slow. Gradually, I reached to a slip road (left bend), controlled by a Give Way sign. All cars, including my, was slowly forming up to take the left turn while giving way to traffic coming from our right.

Soon after, it was my turn to come to the end of the bend. I had approached the bend slowly towards the Give Way sign to look out for any oncoming vehicles on my right. Suddenly, I felt a huge bang from the bang of my car. The force had caused me to move forward from my seat but I did not hit my steering wheel because I had the seatbelt on. My passengers were in trauma and I had them safely out from the car and made them rest on the pavement nearby. There were no visible injuries on them but only complained of pain of their neck and back. I felt pain on my neck and right arm.

On checking, I found a Blue car bearing registration no SMC1749Y was the vehicle that had slammed into the rear of my car. The car had moved forward from its original position to make way for the cars that had formed up behind him. SMC1749Y sustained from left damage. As for my car, it sustained back and rear right side damage but it can still be driven. Ambulance was called (AB441) and conveyed both my passengers to Seng Kang General Hospital.

The male Chinese driver of SMC1749Y came out and apologised to me for not being able to stop in time to prevent the collision.
