Dear Sir/Mdm

Medical Report: LOH JIN WEN S9136791B

I refer to your letter dated 3rd May 2021 requesting for a medical report regarding the abovenamed.

The abovenamed was reviewed in my Neurosurgery clinic on 8th March 2021.

He was involved in a road traffic accident on 5th March 2021. He was the driver of a car which was apparently involved in a side collision with another vehicle which had collided with his car from the driver's side. He had his seat belt on at the time of the accident and the airbag did not deploy.

His right thigh and shin were slightly swollen likely secondary to local contusions as a result of the accident. He did not report any other symptoms to indicate any head or neck injuries. His back and sciatica were also not dissimilar in severity following the accident.

Hence following the accident, he sustained **contusions of the right thigh and shin**.

Mr Loh had earlier on 3rd March 2021 came for a review of his back condition. The condition dates back to 1st September 2020 when he had first been admitted under my care via the Emergency Department and an MRI lumbar spine at that point in time showed L4/5 right posterolateral disc herniation.

I had previously recommended surgical intervention to resolve his symptoms but he was not keen and preferred conservative treatment.

On 3rd March 2021 when he was reviewed in my outpatient clinic, the back pain and sciatica were still present but he had indicated that he preferred to avoid surgery.

However on 8th March 2021 when he came for his review, he affirmed his decision to proceed with surgery despite the pain being similar following the accident on the 5th March 2021.

The contusions of the right thigh and shin were treated conservatively. They should make good recovery without any permanent disability.

Yours Sincerely,

Dr David Choy Kim Seng
