Brief Details.

On 09/07/2021 at about 2115hrs, I was driving along Central Expressway (CTE) on the left lane while it was raining heavily at the time. All of a sudden, the car in front of me (SJQ978X) had jammed their brakes and came to a sudden stop. As I had kept a distance from him, I managed to stop my car in time without colliding into him. While waiting, I did not release my foot brake. I had also saw that the car (SHC4630U) behind me which was a SMRT Taxi had also managed to come to a stop with some space behind my car.

However, in the next moment, there was a big impact from the back of my car which had propelled my car forward to collide into the car in front of me. This incident was a chain collision between 5 cars and one van. All the drivers involved then alighted from their car to exchange our particulars with most of the drivers involved and we had drove off from there onwards. When we had questioned the driver of the car in front of us which is the car furthest front in the chain collision had stopped, he mentioned that he had only stopped as the car in front of him stopped as well. As of now, we are unsure what caused the stoppage of cars.

Due to the collision, I am currently suffering from some back pains and will be seeing a medical practitioner for the injury. My car's front bumper had suffered some dents and the boot of my car had been knocked out of place. I would like to mention that the car does not belong to me but to my mother and my name is included in the car's insurance as well. I would also like to mention that my car has a in-car camera at the front and back. When we viewed back the footage, we had noticed that the Taxi (SHC4630U) behind us had only collided into the back of our car as they were propelled from the collision behind their Taxi as well.
