Dear Derrick

Do have u TP's CCTV footage ? TP Represented by lawyers .

Has LKK obtained the same ( CCTV footage to assess TP damages ???)

Looks like TP damage and damage to our vehicle is minor or none at all . Also dd TP sustain old damages - CCTV footage must be viewed to assist in this assessment . Can we obtain the same from TP lawyers and fwd this to LKK please

Also care to comment on the following images :

Do we need our Insured or Flash to comment on the parts displaced in the following images ??

TP driver – see her medical report – she did not move at all and diagnosis was muscle ache only – See her report please

Were Auto Touts at the scene of this accident – Do u need to speak to GR on the same please

Please upload this to merimen please

### DESCRIBE CIRCUMSTANCES OF THE ACCIDENT

On 02/09/2021 at 06:45 hrs.

My vehicle is stationary along Jalan Bahar.

Suddenly I feel an impact from my rear. I notice that rear of my vehicle was collided by Vehicle B.

**Medical Report : Nadrah binte Sadali**  
**NRIC : S9048135E**

Ms Nadrah visited our clinic in the afternoon of 2nd September 2021 complaining of being involved in a road traffic accident that morning around 6.45am along Jalan Bahar. She was the driver and her car was then stationary at the traffic light. When the light turned green and she was about to move off, with her foot still on the brake, she felt the car behind collided with hers.

She said she did not move much at the point of impact; and neither did any of her body parts come into contact with the steering wheel or other internal parts of her car. She said she "didn't feel anything until two hours later" when she first started to feel some aching at her lower back that "slowly went up" to her mid and upper back between her shoulder blades. Her upper and lower limbs had no symptoms.

At the time of consultation around 4.20 pm that day, she said she had no more symptoms at her lower back, just over her mid back.

Clinically Ms Nadrah was rational and alert. She sat comfortably with her feet crossed during consultation. Her neck examination revealed pain-free full range of movement. There was no muscle spasm felt at her lumbar or thoracic back area; and she exhibited pain-free good range of back movements : forward flexion of 100 degrees, back extension and both lateral flexions of 30 degrees.

She got up easily from her chair and her gait was noted to be normal.

Ms Nadrah was discharged with muscle relaxants and 2 days of medical leave.

Final Diagnosis : Mild muscle strain  
Prognosis : Excellent

Yours faithfully

Best Regards,

**Mekavathanan**
