On 24/12/2021 at around 1955hrs, I was driving my car along PIE towards Changi. I took the exit to TPE. While I was at the slip road to merge into TPE just after the traffic light, I stopped my car to wait for the traffic to clear on the major road. When the traffic have cleared, I began to inch forward again. Before I could accelerate off, I checked and noticed more traffic coming in on the major road. Thus I braked again to a stop.

After I braked, one taxi behind me knocked onto the rear portion of my car. I and the driver came out to exchange particulars. After that, we drove off. During the accident, I did not feel any pain. The taxi driver also does not complain of any injury. My car sustain slight damaged on the rear portion and the taxi sustain slight damaged on the front portion.
