

A survey of SIC808Z was conducted on the 12/04/22.

An estimate without part prices was produced and it was explained by the workshop that due to the extensiveness of the damages, time was needed to check the part prices.

Hence, the survey was done without part prices.

A complete estimate with part prices was only submitted to us in May 2023.

The reason given by the workshop for the delay was that they have overlooked this case.

Please see attached of the marked estimate.

Hope that the above clarifies matters.
