

Hi,

Refer to the statement, I would like to inform that the location in SMQ200X' driver's statement when the accident happened was not correct. The actual location is as below: -

After the merging point there is ONLY one vehicle can pass over point 'A' showing as below: -

My statement is: -

1. When I took a right turn into Marrine Terrace, and merged to straight along right side when the driver of SMQ200X hit my car at right rear dashboard.
2. At that moment the Marine Terrace was full of vehicles, for not block the traffic I decided to turn left after I passed over point 'A', into the open carpark.
3. Unfortunately SMQ200X drove away, and I even did not know the vehicle number.
4. After I checked the scratch was not very serious, I decided not to take any report as the car ran away without plate number.
5. As a matter of fact, the SMQ200X was supposed to be behind my car, but not hit my car's right rear after point 'A' where my car was at correct position.
6. I accept that no claim against each other due to very minor scratch. But if the SMQ 200X is intending to claim my insurance against SKG 663U, I will ask for investigation and claim against SMQ200X.
