Hi Veron, Please let us have your surveyor's comments if third party damages are caused by our insured. We have shared OI and TP video to you.

The photos in OI GVA seems to show that its front number plate was ~~lost~~ ^{detached} at the 4 and 7 area.

The video also show the likely ^{point} ~~point~~ of contact was at the ~~low~~ ^{low} right of TP vehicle, which was where the damage to TP vehicle was observed.

Our opinion, there was slight contact between both vehicles.
