Car accident report dated 30 June 2022 at 0706 hours

On 30 June 2022 (Thursday) at 0706 hours, I was driving along Geylang road towards city (near 208 Geylang Road before Lorong 6 Geylang) on lane 3. The road was a bit wet from last night showers and the traffic conditions was normal. The car in front of mine stopped to filter into SIMS Way (towards PIE). I checked my left side mirror was clear in lane 4 before I signalled left to filter out from lane 3 to lane 4. As I drove out, my car was hit by SNA4383Y (Silver Toyota Prius Hybrid). The driver, Mr. Philip Kho @ [REDACTED] claimed that he failed to stop the car in time which caused damages to my front left hand side lower bumper. From my reverse camera recording, the driver was coming out of Lorong 8 Geylang which he filtered out almost immediately from the left most lane 5 into lane 4 instead of keeping at left most lane 5 first before filtering into lane 4. Also the driver did not indicate lane filtering by turning on his right signal light based on the reverse camera video footage. Based on the video footage, it seems he was accelerating at a higher than normal speed during the filtering of lanes. It was before the bus lane hours (0730 hours to 0930 hours) so there is no good reason to filtered from lane 5 (bus lane) to lane 4 almost immediately. The act above was an unsafe driving practice according to the safe driving highway code. I understand that the accelerating speed of a hybrid vehicle is much more responsive than the internal combustion engine vehicle which all the more hybrid vehicle drivers should be more cautious about the safety driving rules. Both drivers were not injured in the process. I have submitted my front and car rear camera recordings of the accident to facilitate the investigation. Thank you.
