Brief Details.

On the 16/02/2022 i was travelling along the said road, i wanted to turn right towards Bedok Reservoir Rd. I had already checked my mirror that it was clear before i filtered to the lane which was clear, all of a sudden a motorcycle scrapped against the right side of my vehicle causing the right side to sustain some scratches and dents. My side mirror had also dislodge from the side completely, the motorcyclist had then fell onto the side and onto the road divider railing. I had then alighted from my vehicle and went to check on the rider, i had then called for the ambulance and exchanged particulars with the rider. While waiting for the ambulance to arrive, i had taken some photos of the accident. Shortly the paramedics arrived and a while later traffic police came down, the rider was then conveyed to the nearest hospital. The traffic police had then taken my in car dash camera SD card and advised that i lodged a police report with regards to the accident.

MEDICAL REPORT
MUHAMMAD NURRAIHAN BIN ABDUL GHANI
S9728802Z

This report is written based on a review of the available records documented by the attending doctor at Changi General Hospital (CGH) Accident & Emergency department (A&E). The author of this report did not personally examine the patient.

The above mentioned patient was seen at CGH A&E on 16 February 2022. The electronic records were documented at 1419 hours. He complained of left knee pain and right shoulder pain after being involved in a road traffic accident earlier. He mentioned that he was a motorcycle rider who was involved in a collision with a car.

On examination, patient was conscious, alert and hemodynamically stable. There was tenderness at superior aspect with range of motion reduced due pain of the right shoulder. There were two superficial abrasions noted. The left thumb had about 1cm superficial laceration, and the right thumb also had superficial abrasion. The left knee was tender on palpation of medial aspect and the range of motion was reduced due to pain. There was superficial abrasion noted.

X-rays of the chest, left knee and right shoulder were performed which showed no displaced fracture or dislocations.

The clinical impression then was multiple abrasions after a road traffic accident. He was administered oral analgesia and his pain improved subsequently. He was granted outpatient medical leave from 16 February 2022 to 18 February 2022. He was prescribed appropriate medications upon discharge.
