Brief Details.

On the 29/10/2022 at about 1200hrs, i was driving a vehicle bearing plate SKQ4285Z along SLE towards CTE and I was travelling on the first lane of 3 lanes road. I slowed down my vehicle due to traffic camera, then all the cars in front picked up speed, but below the speed limit of 90km/hr. I was maintaining a 2 cars distance from the car in front of me. Suddenly, the cars all slowed down, but I still maintained the distance of 2 cars from the car in front of me. Almost immediately, I felt a very strong impact from the rear of my vehicle. As a result, due to the strong impact, my vehicle surged forward and collided onto another vehicle in front of me, bearing plate number SKS4549C. I alighted from my car and realized that it was a chain accident involving 4 cars (including mine). The car behind me, bearing plate number SLN1641C, was 12metres away from my car. After which, traffic police came to scene and one of the passengers from the 4th vehicle was conveyed by the hospital. My car, the car in front of me and the first car was in contact. The first car's plate number is SMW3636X.

I wish to state that there is an in-car camera in vehicle, however it is not functioning. The traffic police officer still took my SD card for investigations purposes.
