

SKETCH PLAN

DESCRIBE CIRCUMSTANCES OF THE ACCIDENT

On the 12th of March 2023 at approximately 1.55pm, I was driving along PIE Towards Tins on lane 2. All of a sudden, the car in front of me jammed brake (SNF9861A). In order not to hit him, ~~brake~~ I applied emergency brake ~~too~~ and managed to avoid colliding with him. As I was grinded to a halt, I felt a great impact from the back as I was hit by car number (SML544SE), pushing me forward to hit the rear of SNF9861A. Seconds later, a second impact from the back which was likely caused by SKQ3903E pushed me forward, hitting SNF9861A again. I suffered no physical injuries except some bruises on the back of my head but had severe whiplash. I did not immediately hop on the ambulance but subsequently visited Mount Alvernia A&E as I was still feeling very disorientated and did a CT scan / X ray to ensure that everything was alright. I am still suffering from partial memory loss and massive disorientation with occasional anxiety attacks that causes nausea. This was highlighted to the doctors. The impact from behind was great.
